## PULLERS – Posi-Lock®

[www.powerteam.com](http://www.powerteam.com)

- Pullers are used whenever there are tough maintenance challenges: Railroads, Steel & Paper Mills, Mines, Oil Fields, Wind Farms, Factories, Power Plants, Shipyards, etc.

- They are used for maintenance applications such as:

- |                   |                  |
|-------------------|------------------|
| • Boat Motors     | • Propellers     |
| • Tractors        | • Milling Lathes |
| • Excavators      | • Cranes         |
| • Electric Motors | • Rollers        |
| • Railroad Wheels | • Helicopters    |
| • Gearboxes       | • Conveyor Belts |
| • Dragline Shafts | • Pavers         |
| • Air Compressors | • Backhoes       |
|                   | • Bulldozers     |
|                   | • Trenchers      |

## Wide Range of Opportunities

TJM

CONVENTIONAL PULLERS	Power Team – POSI-LOCK PULLERS
Manual floppy jaws often require two men to operate.	Controlled jaws enable pulling jobs to be done with just one man.
Opening, closing, locking & aligning of the jaws is tediously done manually.	Opening, closing, locking & aligning of the jaws is all done automatically by simply turning the T-handle at ease.
Traditional jaws slip off work surfaces or snap back making pulling difficult & challenging.	'Safety Cage' retains & controls the jaws at all times, gripping work surfaces tightly without any slippage.
Pulling is time-consuming & slow.	Pulling is faster, efficient & much safer.

- Features
  - Connects to hubs up to 2" (0 - 51 mm), optional collar connects up to 3" (76 mm)
  - Set screws grip the hub to hold and align the collar adaptor
  - Puller jaws eliminate slippage during fan and blower wheel removal
  - Two models available
    - HP-1: Includes small and large hub puller, square head set screw and tip reducer/extender.
    - HP-2: Includes same components as HP-1, plus model 104 puller
- Benefits
  - Hub Puller Adaptors simplify the removal of many industrial and automotive fans and blower wheels by providing a solid connection between the puller and fan hub.
  - Unique hub collar design allows our general purpose puller to be utilized on chillers, freezers, condensers, ice machines, furnace fans, convection ovens, ice cream machines, exhaust, ventilating fans, auto/truck heater, defroster, AC fans, and more.

A must have for any HVAC repair facility or technician.
